

Public Safety Needs a Nationwide Communications Network. Congress Can Help.

The leaders of police, fire and EMS agencies have united to form the Public Safety Alliance. They are sounding an alarm about the FCC's plan to auction the D Block spectrum. This proposal is a direct threat to public safety's ability to effectively protect and save lives now and in the future.

When police, fire and EMS agencies cannot communicate effectively **lives are lost**. It would be a shame not to learn from the tragic lessons of 9/11 and Hurricane Katrina. America needs Congress to assign the D Block radio spectrum to public safety and provide funding for the Nationwide Communications Network needed to keep America safe. The Public Safety Alliance supports H.R. 5081 - The Broadband for First Responders Act of 2010.

The time is now. America needs a nationwide, interoperable, communications network.

**America Needs Congress to Assign the D Block to Public Safety.
Congress Needs to Provide Funding.
It's Truly a Matter of Life or Death.**
