Re: Support of the PSA's D-Block reallocation and funding for Public Safety broadband networks nationally

Mr. Ors,

As you know my firm has long supported the PSA's efforts to acquire additional radio frequency spectrum and funding for public safety broadband networks nationally. We are honored that APCO has leveraged our experience to provide valuable technical and operational information to your team and the PSA. We have successfully debated the FCC's technical experts and when asked, provided critical information to Legislators and members of the Administration. Recent changes in positions on the Hill and The Administration are as a result of your steadfast positioning, the PSA's extraordinary influence and our tireless input to the process. We are proud to work with you, your organization and the PSA and we are committed to continuing our support until we reach a successful conclusion. Rest assured that we will not falter in our commitment to APCO and the PSA. Please continue to call when needed and we will continue to be there for one of America's most valuable natural resources; our First Responders.

Respectfully submitted,

Robert LeGrande, II
